Favour Adeniyi

Backend Engineer

Lagos, Nigeria · adeniyifavour49@gmail.com · +234 806 920 0740 · github.com/FavourAdeniyi · linkedin.com/in/favouradeniyi

SUMMARY

I design authenticated, documented, deployable backend systems — JWT and RBAC, schemas that can evolve, and CI/CD that gets code into production. Including a live client site + admin system shipped via Afriment.

EXPERIENCE

Backend Developer — Freelance — product APIs — Jan 2024 — Present

Remote / Lagos · Alongside HND studies since Jan 2025

- Designed REST surfaces in Node.js and Express with JWT authentication and role-based access control.
- Modeled and optimized schemas across MongoDB and PostgreSQL for evolving product requirements.
- Integrated payment gateways and email providers behind stable service boundaries.
- Shipped to Render and Railway with CI/CD, and documented every public route in Swagger / OpenAPI.

Software Engineer — Intern — Afriment · assigned to Excalet Integrated Services — Sep 2026

Remote / Nigeria · Alongside HND studies

- Built the full public site (Home, Services, About, Gallery, Contact) with responsive UI and clear conversion CTAs.
- Implemented quote request capture plus a protected admin dashboard (session auth, bcrypt) so the business can view and manage leads.
- Shipped on Vercel with Git-based deploys; iterated on form reliability, security (.env out of repo), and production fixes.
- Owned end-to-end delivery: Express + EJS + Tailwind stack, Nodemailer notifications, and live evidence on GitHub and production.

Backend Developer Intern — Solags Nigeria Limited — Jan 2023 — Dec 2023

Ikeja, Lagos · Alongside ND studies

- Assisted in backend services for internal tools and client projects, writing reusable modules instead of one-off scripts.
- Partnered with frontend engineers and designers so contracts landed before UI work began.
- Tested and debugged APIs in Postman and Insomnia; took part in reviews and stand-ups.

IT Support & Developer Intern — De Crownes Electronics — Jan 2022 — Dec 2022

Cole-Ijesha, Lagos · Alongside ND studies

- Supported deployment and maintenance of live web applications.
- Managed databases and ran regular backups so recovery was a procedure, not a prayer.
- Automated recurring ops with scripts and documented the system so the next person could run it.

PROJECTS

Excalet Website + Admin Quotes — Live in production

Node.js · Express · EJS · Tailwind · Sessions · Vercel

A facility-services company in Owerri needed a professional digital presence and a reliable way to capture and manage quote requests — not another brochure page that dies after deploy.

- Public marketing site with services, about, gallery, and contact — mobile-ready.
- Authenticated admin inbox for quote requests (date, contact, service, message).

excalet-website.vercel.app · github.com/FavourAde1/excalet-website

Task Management API — Production-shaped

Node.js · Express · MongoDB · JWT

Teams need a single source of truth for work, with role-aware access and a contract a client can paginate against.

- CRUD on tasks with role-based access, not a single shared bucket.
- Pagination and filtering so list endpoints stay usable as data grows.

github.com/FavourAdeniyi/task-management-api

Expense Tracker API — Production-shaped

Node.js · Express · MySQL · JWT

Personal-finance products fail when the ledger is not trustworthy. The backend has to be the system of record.

- Authenticated ledger with categorized transactions.
- Monthly report endpoints so the client never re-implements sums.

SKILLS

Languages JavaScript / Node.js, SQL, Python

Frameworks Express.js, NestJS, Django / Flask
Data MongoDB, MySQL, PostgreSQL, Redis
Platform Git / GitHub, Docker, Linux / Nginx, Render / Railway, Vercel

EDUCATION

Higher National Diploma — Mechatronics Engineering Jan 2025 — Current
Yaba College of Technology, Yaba, Lagos

National Diploma — Electrical and Electronics Engineering Jan 2021 — Dec 2023
SAF Polytechnic, Iseyin, Oyo State

Senior Secondary Certificate (O-Level) Sept 2017 — Aug 2020
Okota Senior Secondary School, Lagos · Laboratory Prefect

CERTIFICATIONS

Backend Development (TechCrush NG) · API Design Best Practices (freeCodeCamp, 2023) · Node.js & Express.js (Udemy, 2024) · MongoDB Basics (MongoDB University, 2024) · Git & GitHub (freeCodeCamp, 2023) · 3MTT Certified (3 Million Technical Talent) · Afriment Internship — Software Engineer (Afriment, 2026)

LANGUAGES

English (Fluent) · Yoruba (Native)
